BIOMETRIKA

FOUNDED BY

W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

MANAGING EDITOR

E. S. PEARSON

ASSOCIATE EDITORS

M. G. KENDALL JOHN WISHART

in consultation with

HARALD CRAMÉR J. B. S. HALDANE

R. C. GEARY MAJOR GREENWOOD

VOLUME XXXVI

1949

ISSUED BY

THE BIOMETRIKA OFFICE, UNIVERSITY COLLEGE, LONDON

PRINTED AT THE UNIVERSITY PRESS, CAMBRIDGE

PRINTED IN GREAT BRITAIN

CONTENTS OF VOLUME XXXVI

Memoirs

		PAGES
I.	The infectiousness of measles. By Major Greenwood	1—8
II.	A note on the analysis of grouped probit data. By K. D. Tocher	9—17
III.	A generalization of Poisson's binomial limit for use in ecology. By Marjorie Thomas	18—25
IV.	The estimation and comparison of residual regressions where there are two or more related sets of observations. By A. H. Carter	26—46
V.	Cumulants of multivariate multinomial distributions. By John Wishart	47—58
VI.	On the Wishart distribution in statistics. By A. C. Aitken	59—62
VII.	The spectral theory of discrete stochastic processes. By P. A. P. Moran	63—70
VIII.	On a property of distributions admitting sufficient statistics. By V. S. Huzurbazar	71—74
IX.	On a method of trend elimination. By M. H. Quenouille	75—91
X.	On the estimation of dispersion by linear systematic statistics. By H. J. Godwin	92—100
XI.	On the reconciliation of theories of probability. By M. G. Kendall	101—116
XII.	The derivation and partition of χ^2 in certain discrete distributions. By H. O. Lancaster	117—129
XIII.	A note on the subdivision of χ^2 into components. By J. O. Irwin.	130—134
XIV.	The first and second moments of some probability distributions arising from points on a lattice and their application. By P. V. Krishna Iyer. With one Figure in the Text	135—141
XV.	Probability Tables for the range. By E. J. Gumbel. With two Figures in the Text	142—148
XVI.	Systems of frequency curves generated by methods of translation. By N. L. Johnson. With twelve Figures in the Text	149—176
XVII.	Rank and product-moment correlation. By M. G. Kendall	177—193
XVIII.	Tests of significance in harmonic analysis. By H. O. Hartley	194—201
XIX.	The non-central χ^2 and F-distributions and their applications. By P. B. Patnaik. With four Figures in the Text	202—232
XX.	The estimation of the parameters of tolerance distributions. By D. J. Finney	239—256
XXI.	An overlap problem arising in particle counting. By P. Armitage. With one Figure in the Text	257—266
XXII.	Tables of autoregressive series. By M. G. Kendall	267—289
XXIII.	Tables for use in comparisons whose accuracy involves two variances, separately estimated. By Alice A. Aspin. With an Appendix by B. L. Welch	290—296

		PAGES
XXIV.	Bivariate distributions based on simple translation systems. By N. L. JOHNSON. With seventeen Figures in the Text	297—304
XXV.	A test for randomness in a sequence of two alternatives involving a 2×2 table. By P. G. MOORE	305—316
XXVI.	A general distribution theory for a class of likelihood criteria. By G. E. P. BOX	317—346
XXVII.	Note on approximations to the power function of the '2×2 comparative trial'. By G. P. SILLITTO. With one Figure in the Text	347—352
XXVIII.	The distribution of 'Student's' t in random samples of any size drawn from non-normal universes. By A. K. GAYEN. With four Figures in the Text	353—369
XXIX.	The combination of probabilities arising from data in discrete distributions. By H. O. LANCASTER. With one Figure in the Text	370—382
XXX.	Note on the application of Fisher's k-statistics. By F. N. DAVID	383—393
XXXI.	The moments of the z and F distributions. By F. N. DAVID	394—403
XXXII.	The method of frequency-moments and its application to type VII populations. By HERBERT S. SICHEL.	404—425
XXXIII.	On the use of Student's t-test in an asymmetrical population. By S. G. GHURYE	426—430
XXXIV.	Tables of symmetric functions. Part I. By F. N. DAVID and M. G. KENDALL	431—449

Miscellanea

(i)	On a method of estimating frequencies. By D. J. FINNEY	233—234
(ii)	A further note on the mean deviation from the median. By K. R. NAIR.	234—235
(iii)	Review of Harold Jeffreys' *Theory of Probability*. By F. N. DAVID	236
(iv)	Review of *Karl Pearson's Early Statistical Papers*. By G. U. YULE	236—238
(v)	On the efficiency of the method of moments and Neyman's type A distribution. By L. R. SHENTON	450—454
(vi)	Large-sample theory of sequential estimation. By F. J. ANSCOMBE	455—458
(vii)	A historical note on the method of least squares. By R. L. PLACKETT	458—460
(viii)	The characteristic function of a weighted sum of non-central squares of normal variates subject to s linear restraints. By G. I. BATEMAN	460—462
(ix)	Intra-class rank correlation. By J. W. WHITFIELD	463—467
(x)	A note on non-normal correlation. By J. B. S. HALDANE	467—468
(xi)	Review of F. N. DAVID's *Probability Theory for Statistical Methods*. By C. A. B. SMITH	469—470
(xii)	Review of T. L. KELLEY's *The Fundamentals of Statistics*. By F. N. DAVID	470
